#### Sustainability Report 2024

Our company's annual environmental impact and sustainability metrics We have broken the link between business growth and environmental footprint. Since 2022, our revenue has soared by 46%, yet our operational emissions have plummeted by 55%. This "decoupling" is the ultimate proof that a responsible business model can deliver robust financial performance while actively regenerating the planet.

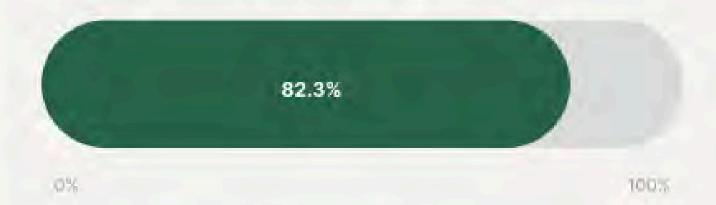

#### Board composition 2025

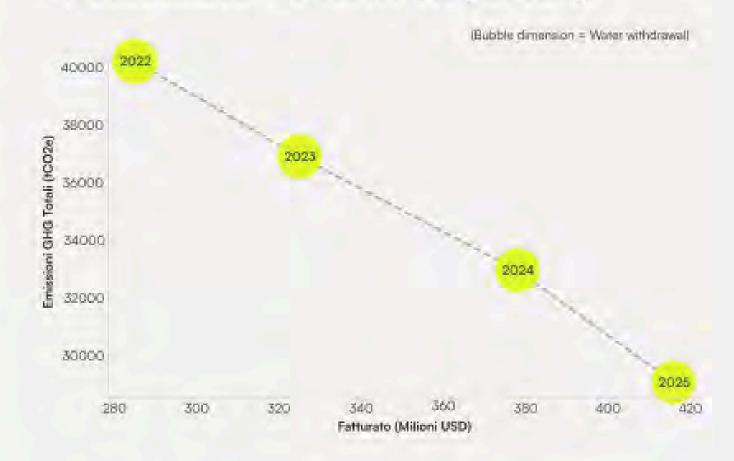

#### A snapshot of modern leadership.

Our 2025 Board of Directors achieves a critical balance: high independence (70%, inner ring) for unwavering accountability, and strong gender diversity (40%, outer ring) to reflect the world we serve. Our balanced composition is key to navigating complex global challenges with integrity and foresight.

### Latest investment in employee training & wellbeing

#### Sustainable Growth Trajectory

This is what sustainable scaling looks like. Following our trajectory from 2022 to 2025, you can see our revenue growing while our total carbon footprint shrinks. The size of each bubble represents our water usage, which also shrinking, It's a powerful visual confirmation of our triple-bottom-line success: People, Planet, and Profit
