

ESG4ALL

NOI Hackathon

Our team

Matvey Minervini
Backend Developer

Lev Bernshteyn
Frontend Developer

Albert Minikh
Data Analyst

Arsenii Patutin
AI Integration Engineer

Our project

- An interactive dashboard
- Literally **ESG for all**
- Fast, clear, transparent
- The main objective:
make ESG data **intelligible for everyone**

How did we solve the challenge?

Create an environment for easy and straightforward understanding and production of ESG data:

- Integrate a centralised database (no more complicated papers)
- Integrate a smart dashboard for visual comprehension
- Integrate LLMs for clear statistics' analysis

Technological stack

- **FastAPI** for backend
- **HTML, CSS & JS** for frontend
- **PostgreSQL** for database
- **Google GenAI API** for AI assistance

Let us take a look at the
prototype.
