ECO-CLOCK

Transforming a **common object** found on everyone's desks into a system that **interfaces with the user**, and through **gamification**, attempting to have an impact on the world, or at least **have less of an impact**.

DEMO

ONE MORE THING...

ECOVERSE

The **Eco-Clock** is just a piece of a larger puzzle:

- The system we built is **easily extensible** to other **sensors** and **gadgets**
- The same **scoring system** can be used for various sustainability metrics
- **Huge potential**

Thank

You
